

TABLE OF CONTENTS

CHAPTER I : The Historical Prolegomenon	1 - 21
Section 1. The Challenge Problem	1 - 4
Section 2. George Boole's Theory of Probability	4 - 6
Section 3. Appraisals of Boole	6 - 9
Section 4. John Maynard Keynes	9 - 13
Section 5. Studying Boole's Probability Theory	13 - 15
Section 6. Theodore Hailperin	15 - 20
Section 7. The Plan of Attack	20 - 21
CHAPTER II : Boole's Logic and His Probability Theory	22 - 88
Section 8. Guide to this Chapter	22 - 23
Section 9. Boole's Logic	23 - 36
Section 10. Boole's Logical Analysis, Some Examples & Comments	36 - 42
Section 11. Boole's Probability & the Orthodox Theory Contrasted	42 - 44
Section 12. Boole's Assumptions	44 - 48
Section 13. Boole's Probability Theory	48 - 57
Section 14. Boole's Method: A Verbal Transcription	57 - 58
Section 15. The Determination of Boole's V	59 - 60
Section 16. The Argument From V to the Equations	60 - 62
Section 17. The Solution of the Equations	62 - 66
Section 18. Boole's Procedure: Simplified and Summarized	67 - 68
Section 19. An Example Comparing Boole's Method with the Proposed Emendation	69 - 76
Section 20. Some of Boole's Examples, Based on Two Events	76 - 78
Section 21. Some of Boole's Examples, Based on Three Events	78 - 88
CHAPTER III : The Challenge Problem	89 - 108
Section 22. The Challenge Problem	89 - 90
Section 23. Cayley's Solution of the Challenge Problem	90 - 93
Section 24. Boole's Solution of the Challenge Problem	93 - 94
Section 25. Boole and Cayley: the Disagreement	94 - 100
Section 26. Keynes on the Challenge Problem	100 - 102
Section 27. Boole's Variations on the Challenge Problem	102 - 105
Section 28. Wilbraham's Criticism of Boole's Solution	105 - 108

Chapter IV : Boole's Theory of Probability: Some Comments, A Correction, and an Extension	109 - 155
Section 29. Guide to This Chapter	109 - 110
Section 30. The Correctness of Boole's Theory	110 - 115
Section 31. The Usefulness of Boolean Variables	116 - 138
Section 32. Is a Given Boolean Analysis Unique?	138 - 146
Section 33. Boole's Conditioned Variables	147 - 153
A: Boole's Theory and Donkin's Principle	147 - 149
B: Boole's Note	149 - 151
C: Donkin's Principle and Conditioned Variables	151 - 153
Section 34. Boole's Theory of Probability	153 - 155
Chapter V : Some Applications of Boole's Theory	156 - 195
Section 35. Guide to This Chapter	156 - 157
Section 36. The Boolean Algebra of Media Data	157 - 164
Section 37. Some Useful non-Boolean Approaches to Media Data	164 - 180
A: Finding Bounds on Probabilities; LP	166 - 170
B: Jaynes' Principle	170 - 173
C: Changing N	174 - 175
D: Regression Analysis and Partial Information	176 - 180
Section 38. The Boolean Argument Applied to Media Data	181 - 191
Section 39. The Structure of Contingency Tables	191 - 194
Section 40. Boole's Theory of Probability	195
Appendix A : Boolean Algebra: A Brief Summary	196 - 198
Appendix B : An Example of the Complexity of Boole's Method	199 - 203
Appendix C : On Solving the Boolean Equations	204 - 205
Appendix D : Using Jaynes' Principle	206 - 207
Footnotes	208 - 211
Index	212 - 215
